

# INDEX

---

Experiment No.	Name of the Experiment	Page Number
1.	A program to print an array	02-03
2.	A program to print a two dimensional array or amatrix	04-06
3.	A program to find the location of a number of an array using linear search	07-09
4.	A program to find the location of a number using binary search	10-13
5.	A program to sort a list of data using bubble sort	14-16
6.	A program to find the sum of two matrices	17-20
7.	A program to multiply two matrices	21-24
8.	A program to find the length of a string	25-26
9.	A program to copy a string	27-28
10.	A program to merge two strings	29-31
11.	A program to compare two strings	32-34
12.	A program to check whether a given string is a palindrome or not	35-37
13.	A program to print local variables	38-39
14.	A program to print global variables	40-41
15.	A program of passing parameters using call by value	42-43
16.	A program of passing parameters using call by reference	44-45
17.	A program to implement stack	46-51
18.	A program of structure	52-53
19.	A program of union	54-55
20.	A program of file	56-58
21.	A program to print an integer using pointer	59-60
